Short bio

As a web developer and PHP evangelist in Brazil, I have participated in many discussion groups, forums, PHP community and open source events in general, such as InfoQ, PHP Conference Brazil, Campus Party, FLISOL and others. I am passionate about technology, movies, Sci-fi literature and classic Rock'N'Roll music. I am always connected to new products and technologies being an early adopter. I have been working with Internet programming for more than nine years, using the latest technologies available in the market, having followed the growth of PHP as language and the Internet as a work tool. I have pursued and successfully build web systems, API's, e-commerce platforms and applications following the best programming practices, software standards and design patterns. I have a Bachelor's degree in Information Technology by University of São Paulo and I am working in the company Smartbox Group, based in Dublin - Ireland, as a Senior Software Developer.

Developer work tools
